Volunteers Needed for Brain Imaging Research Study

If you have no history of depression or bipolar disorder, no recent antidepressant/mood stabilizer use, and are between the ages of 20-64, you may be eligible!

• This study is looking at how brain structural and functional pathways influence mood and cognition.
• This study involves 3 visits to our laboratory. All visits must be completed within one month, and visits last approximately 4 hours each.
• This study involves blood draws and brain scans.
• Eligible participants must pass a drug test and not be pregnant.
• Participants can earn up to $350 for completing all appointments.

Please call (310) 825-4875 or e-mail DGCBrainImagingStudy@mednet.ucla.edu and ask to speak to the Depression Connectome Study Coordinator.
