

Volunteers needed for ECT Research Study

You may be eligible if:

- You have been diagnosed with major depression
- You are scheduled to have ECT at UCLA
- You are 21 years or older
- You are able to have an MRI

PARTICIPANTS CAN RECEIVE UP TO \$625 FOR COMPLETING ALL RESEARCH PROCEDURES

PARKING WILL BE REIMBURSED FOR UCLA RESEARCH VISITS

About the study:

This study uses MRI scans and clinical and cognitive tests to evaluate optimal ECT dosing

For this research you will be asked complete cognitive tasks, mood scales, and MRI scans at three time points during your medically indicated ECT treatment.

The three research visits are before starting ECT, midway through, and at the end of ECT treatment

You will also receive a clinical follow-up 1-month after ending ECT

Please contact the ECT study coordinator at:
